LEGEND

- 1) As an example in the case of gas installations, "other" can be understood as the replacement of a permanently installed appliance.
- 2) Indicate: name, surname, qualification and, where required under Art. 5, paragraph 2, details of registration with the relevant professional association, of the technician who drew up the project.
- 3) Cite the technical and legal standard(s), distinguishing between those referring to design, execution and verification.
- 4) If the plant executed on the project is changed in the course of construction, the project submitted at the end of the work must include the variations made in the course of construction. Citing the fire prevention file (where required) is part of the project.
- 5) The report must contain, for products subject to standards, the declaration of compliance with those standards, supplemented, where existing, with references and marks, test certificates, etc., issued by authorised institutes. For other products (to be listed), the signatory must declare that the materials, products and components comply with Articles 5 and 6. The report must declare suitability for the installation environment. When relevant to the proper functioning of the system, the number or characteristics of installed and installable appliances must be specified (e.g. for the gas: 1. number, type and power of the appliances; 2. characteristics of the components of the room ventilation system; 3. characteristics of the exhaust system
- 6) A diagram of the completed system means the description of the work as it was carried out (a simple reference is made to the project when this has been drawn up by a qualified professional and no variations have been made during the work). In the case of conversion, extension and extraordinary maintenance, the intervention must be framed, if possible, in the diagram of the pre-existing system. The diagram will mention the fire prevention file (where required).
- 7) The references consist of the name of the contractor and the date of the declaration. For installations or parts of installations constructed before the entry into force of this decree, the reference to declarations of conformity may be replaced by a reference to declarations of compliance (Art. 7, para. 6). In the event that part of the installation is set up by another company (e.g. ventilation and smoke exhaust, in gas installations), the declaration must refer to the similar references for these parts.
- 8) Example: any certificates of the results of checks carried out on the installation before commissioning or treatments for cleaning, disinfection.
- 9) On completion of the work, the installation company must issue the client with a declaration of conformity of the systems in compliance with the regulations under Art. 7. The client or the owner must entrust the installation, conversion, extension and maintenance works of the systems referred to in Art. 1 to companies qualified in accordance with Art. 3.
